

Cosmin Căbăroiu

PRODUCT DESIGNER / AI PRODUCTS

12

Years of Experience

Product Designer specializing in AI products, from concept to launch. My work spans AI developer tools, Ai products and fintech/banking, including Sesori and VESPR.

Professional Experience

DigitalBlock Labs LTD

Product Designer

2025 - Present

Designed Sesori from the ground up: a mobile app for monitoring and controlling AI coding sessions running on a computer. The central design challenge was bringing desktop workflows to a phone while keeping the interface simple.

Created UI and interactions to help developers find projects, follow AI agents at work, and spot new updates at a glance.

Developed the voice-composer concept so developers can dictate prompts and review them before sending.

Sesori surpassed +2,000 users in August 2026.

Helped transform VESPR into Cardano's largest wallet, reaching 50,000 ADA in monthly recurring revenue at its peak.

Product design for VESPR's self-custody wallet across mobile and browser experiences.

Dakora

Product Designer

2025

Designed Dakora from the ground up: a platform for AI prompt management and optimization in production workflows.

Codex, Claude Code, Cursor, Visual Studio Code, GitHub

Visual and motion
Adobe Creative Cloud, Rive, Spline, Cinema 4D

Research and collaboration
Hotjar, Miro, Jira, Confluence, Asana, Slack

COSMIN

Deutsche Bank

Design System Architect

2024 - 2025

Built & updated Deutsche's multi-brand design system.

Worked with designers and engineers on consistent implementation and accessibility.

Independent work

Lead Product Designer

Started 2024

Led design for Web3 and fintech product XOXNO, from research and journey mapping to prototypes and implementation.

Designed onboarding, bridging, swap and payment flows, supported by tokenized design systems.

Intive

Senior User Experience Designer

2022 - 2024

Owned end-to-end product design for an enterprise conversational AI chatbot.

Designed banking experiences covering dashboards, transactions, KYC/AML onboarding and payments.

Microsoft

UI/UX Designer

2017 - 2023

Designed chatbot interfaces and conversational flows for the Microsoft and Xbox customer support bot framework.

Worked on telemetry and dashboards for ESI.

Developed visual identity and communications for the WWL division.
